Falcon Updates Strut Mount Program!

In a continued effort to be a first to market supplier, Falcon Steering Systems is pleased to provide the updated **2009 Strut Mount program**, which now includes over **425 SKU's**. The new program covers most makes and models, including extensive import coverage for both European and Japanese vehicles. **The Falcon Strut Mount program** also provides all the necessary hardware mounting kits (where applicable) to ensure the job is done right the first time.

Some new late model popular applications include:

- Chevrolet Impala 2008-2005
- Buick Lucerne 2008-2005
- KIA Sportage 2008-2005
- Toyota Matrix 2008-2005
- Toyota Prius 2008-2004

To access and download the new 2009 Strut Mount application catalog, visit:

Key Product Features Include:

Activant & WHI Solutions Electronic Catalog Update!

Falcon Steering Systems has been working diligently to update our electronic application data on **Strut Mounts and Control Arms** and are happy to confirm that ACES files and product images were recently submitted to both **Activant and WHI** (Wrenchhead). The expected data release dates for both Activant & WHI are scheduled for July.

Additionally, the new application catalogs for both Strut Mounts and Control Arms are in PDF format and can be downloaded directly from our website at www.falconsteering.com.

On behalf of the entire Falcon Steering Team, we thank you for your support and look forward to continued success together.
